DEFINITIONS

ALL ENTRIES SHALL CONFORM TO THE STRICTER OF THESE DEFINITIONS FOR ACCEPTANCES TO BE VALIDATED BY THE INTERNATIONAL ORGANIZATIONS GRANTING RECOGNITION OR PATRONAGE.

FIAP DEFINITION OF THE BLACK AND WHITE PHOTOGRAPHY (MONOCHROME)

A black and white work fitting from the very dark grey (black) to the very clear grey (white) is a monochrome work with the various shades of grey. A black and white work toned entirely in a single colour will remain a monochrome work able to stand in the black and white category; such a work can be reproduced in black and white in the catalogue of a salon under FIAP Patronage. On the other hand a black and white work modified by a partial toning or by the addition of one colour becomes a colour work (polychrome) to stand in the colour category; such a work requires colour reproduction in the catalogue of a salon under FIAP Patronage.

FIAP NATURE DEFINITION

Nature photography records all branches of natural history except anthropology and archaeology. This includes all aspects of the physical world, both animate and inanimate, that have not been made or modified by humans.

Nature images must convey the truth of the scene that was photographed. A well-informed person should be able to identify the subject of the image and be satisfied that it has been presented honestly and that no unethical practices have been used to control the subject or capture the image. Images that directly or indirectly show any human activity that threatens the life or welfare of a living organism are not allowed.

The most important part of a Nature image is the nature story it tells. High technical standards are expected and the image must look natural. Adding a vignette or blurring the background during processing is not allowed.

Objects created by humans, and evidence of human activity, are allowed in Nature images only when they are a necessary part of the Nature story.

Photographs of human-created hybrid plants, cultivated plants, feral animals, domesticated animals, human-created hybrid animals and mounted or preserved zoological specimens are not allowed.

Images taken with subjects under controlled conditions, such as zoos, are allowed.

Controlling live subjects by chilling, anaesthetic or any other method of restricting natural movement for the purpose of a photograph is not allowed.

No modification that changes the truth of a Nature image is allowed. Images may be cropped but no other technique that removes, adds or moves any part of the image is allowed.

Techniques that remove elements added by the camera, such as dust spots, digital noise and lens flare are allowed.

Complete conversion of colour images to greyscale monochrome is allowed. Partial conversion, toning and infrared captures or conversions are not allowed.

Images of the same subject that are combined in-camera or with software by focus stacking or exposure blending are allowed. Multiple images with overlapping fields of view that are taken consecutively and combined in-camera or with software (image stitching) are allowed.

Borders For the purpose of this exhibition any border added to a Nature digital file must be a single border of white or grey, no greater than 3 -5 pixels in width.

FIAP PHOTOJOURNALISM PHOTOGRAPHY DEFINITION

Photojournalism entries shall consist of images with informative content and emotional impact, reflecting the human presence in our world. The journalistic (storytelling) value of the image shall receive priority over pictorial quality. In the interest of credibility, images that misrepresent the truth, such as those from events or activities specifically arranged for photography or of subjects directed or hired for photography, are not eligible. Techniques that add, relocate, replace or remove any element of the original image, except by cropping, are not permitted. The only allowable modifications are removal of dust, scratches or digital noise, restoration of the existing appearance of the original scene, sharpening that is not obvious, and conversion to grayscale 'monochrome. Derivations, including infrared, are not eligible.

HPS SURREALISTIC PHOTOGRAPHY DEFINITION

Surrealism (surrealism, from the French sur – "over from" and réalisme – "reality") is a cultural movement which developed in the middle of the third decade of the 20th century and influenced all the forms of art. According to the Surrealistic Manifest of Andre Breton, in 1924, the definition was: "Pure psychic automatism, by which one proposes to express, either verbally, in writing, or by any other manner, the real functioning of thought. Dictation of thought in the absence of all control exercised by reason, outside of all aesthetic and moral preoccupation". Surrealism in photography is expressed with some techniques, where the surrealists altered the realistic photography. These techniques, at the time of analogue photography, were: Solarization, negative film printing, multi exposure, photo montage, collage etc. Today, the techniques have been dramatically changed and the digital process, with software such as Photoshop, gave a new boost and new form of surrealistic photography.
